

Dear Councilor _____:

Subject: Request for New Definition in the Tulsa Zoning Code to Transform Tulsa's Food System through Innovation

I support the initiative to change the City of Tulsa's zoning code to encourage urban agriculture as a use by right in all zoning districts. Please combine Sections 35.090-B and 35.090-C to accommodate the below changes

1. New Definition of Urban Garden.

35.090-B ~~Community~~ Urban Garden

An ~~area less than one acre in~~ area that is managed and maintained by an individual, group or business entity ~~a group of individuals~~ to grow and harvest food crops or non-food crops (e.g., flowers) for sale or distribution. An ~~community~~ urban garden area may be divided into separate garden plots or orchard areas for cultivation by one or more individuals or may be farmed collectively by members of ~~the a~~ group. ~~Community~~ Urban gardens may be principal or accessory uses and may be located on a roof or within a building.

2. Urban Gardens shall be a use by Right in all Zoning Districts
3. Provide the best practices of the Healthy Neighborhood Overlay concept across all of Tulsa.

I want to see Tulsa grow from the inside out and continue to promote the entrepreneurial spirit we have historically embraced! I look forward to your positive action regarding this request. Thank you for your service.

Sincerely,
